Introduction

Industry Trends are prepared to aid in research, policy making, economic development and other activities that require a reasonable glimpse into the future. These projections serve as important indicators of the relative magnitude and probable direction of industry growth and decline. This publication accounts for a ten-year projection period, and the figures represent a likely relationship between industries, given that the following economic assumptions remain true:

1. The institutional framework of the United States and Alabama economies will not radically change.
2. Major events, such as a widespread, long-lasting energy shortage or a war will not significantly alter the industrial structure of the economy or the rate of economic growth.
3. Current technological, scientific, and social trends such as values placed on work, education, income and leisure will continue.

For projections purposes, data is presented in a total employment concept. This includes wage and salary employment, agricultural workers, self-employed, unpaid family workers of a family-owned business, and those employed in private households as domestic workers. Government-owned hospitals, educational providers, and post office data will appear in their respective industry groups rather than in the government sector. Certain precautions are taken to keep the identity of survey respondents confidential, therefore some industry data may not appear in this publication. However, the data will appear in industry group totals and the total employment data in order to present an accurate picture of employment in the area.

Highlights

- ❖ By the year 2016, just over 2.4 million workers will be employed in Alabama.
- ❖ Total Employment is expected to climb well over 14 percent between 2006 and 2016, representing an average annual growth rate of 1.38 percent.
- ❖ Statewide, Manufacturing should net growth of over 6,500 jobs by the year 2016. This net change is the result of over 21,000 additional jobs expected in Durable Goods Manufacturing, balanced against an anticipated loss of almost 14,500 jobs in Nondurable Goods. While the percent change in the number of jobs lost is greater than those gained, the state overall is expected to grow by 2.18 percent over the ten year period. Manufacturing in Alabama should grow a scant average annual .22 percent and is in contrast to the nation, where the average annual change will probably be a loss of about 1.10 percent.
- ❖ Service producing sectors are likely to experience the largest percentage of growth in Administrative and Support and Waste Management and Remediation Services with over 38,700 new employment opportunities, representing an average annual gain of 3.15 percent. Arts, Entertainment, and Recreation industries are also expected to grow an annual average 2.92 percent. The Professional, Scientific, and Technical Services sector is projected to add over 26,600 jobs to the labor market economy also. This represents 2.52 percent growth on an average annual basis. Gains across Service Producing sectors will account for over 89 percent of the total gain across all industries by the year 2016.
- ❖ Workforce Development Region 9 in the southwest corner of the state is expected to increase total employment by 22 percent for the ten year period, adding almost 70,000 jobs across the area. Region 2 in the northeast can expect an increase over 16 percent with more than 68,400 jobs. Finally, Region 8 on the eastern border of the state is expecting more than 14,380 additional jobs. That translates into 1.46 percent average annual growth by 2016.
- ❖ The fastest growing detailed industry in the state is projected to be Iron and Steel Mills and Ferroalloy Manufacturing (NAICS 3311); almost doubling their base year employment due to new plants locating in Region 9.
- ❖ Textile and Fabric Finishing and Fabric Coating Mills (NAICS 3133) as well as Fabric Mills (NAICS 3132) are both expected to lose almost half of the respective industries' base year employment.

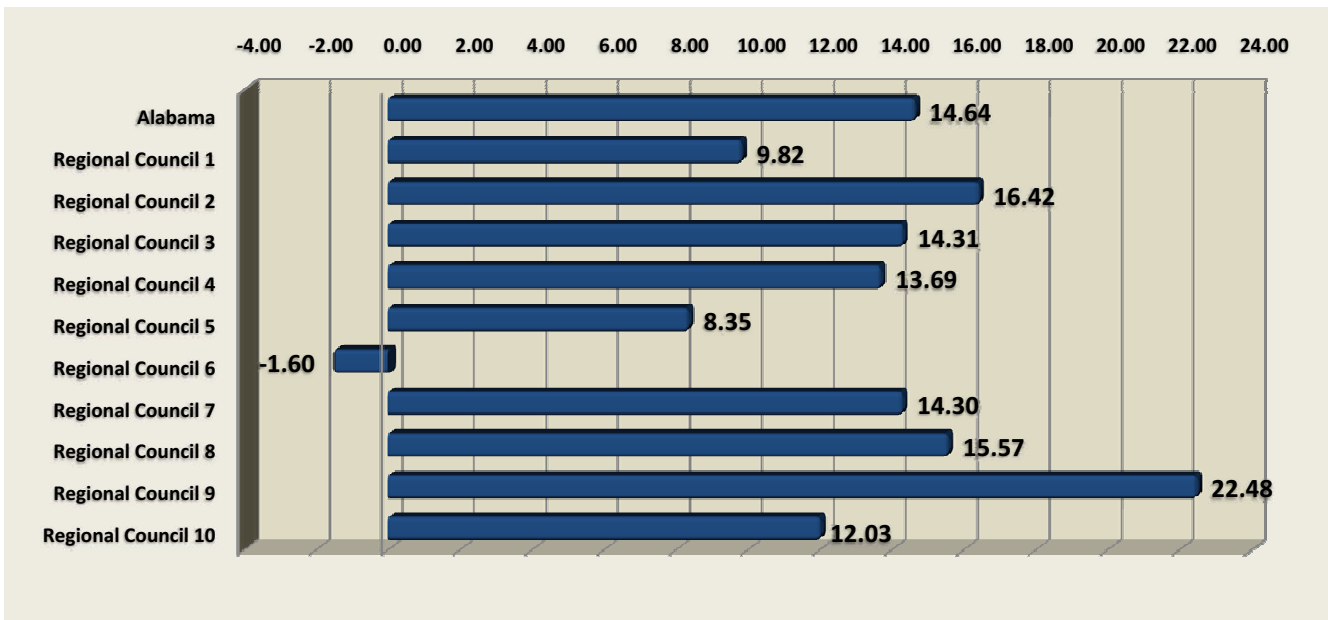

Summary of Employment¹ and Annual Growth Rates² State and Workforce Development Regional Councils

Area	2006 Employment	Percent of Distribution in 2006	2016 Employment	Percent of Distribution in 2016	Net Change	Percent Change	Avg Annual Growth Rate (%)
